

ACECell™ W

Introduction

ACECell™ W Series are made of high density polyethylene material with or without perforation. The shape of the perforation can be oval or round, especially the amount of perforations and the smooth or textured surface appearance can be produced according to client's requirements. ACECell™ W Series can be stretched out and folded, therefore, it is convenient to install and easy to transport it.

Applications

- Roadway, sidewalk and highway foundation reinforcement.
- Embankment and slope vegetation.
- Facing system of reinforced retaining wall.

Characteristics

- High compression and high impact resistance strength.
- Easy for construction.
- Excellent performance of vegetation.
